Mr Thomas Fitzgerald Vincent
Accountable Manager
Aerotech Aviation Pty Ltd
Santa Teresa Road,
Alice Springs Airport,
N.T 0870

Dear Mr Vincent,

Aerotech Aviation Pty Ltd – MOE CAAS SUPPLEMENT - Approval

Part 145 Approval Certificate Number: 1-11HDHI

CASA has reviewed your application seeking approval of the MOE CAAS supplement "Aerotech/CAAS-CASA TA MOES" Issue 1, Rev 0 dated 10 July 2014 to accompany your Part 145 exposition, Issue 1, Revision 0 – dated 01 July 2014. CASA has completed the review of your supplement against the requirements for participation under the Technical Arrangement (TA) for maintenance between CAAS and CASA, as described in Advisory Circular 145-5(v1.1). This assessment has found the supplement is acceptable for the purpose of meeting these requirements of the Technical Arrangement (TA).

Further to this approval letter, CASA will notify the CAAS designated office mentioned in Paragraph 16 of the TA, that CASA has accepted your maintenance organisation under the provisions of the TA. CASA will also be updating AC 145-5 to list your organisation as one that has met the requirements for participation under the arrangement.

When releasing aircraft under the terms of the TA that also fall within the scope of your CASR Part 145 approval, it is important that the procedures detailed in the supplement are followed. In addition, you should carefully consider whether any future changes made to your CASR Part 145 exposition, or approval, in turn affect the supplement.

The Aerotech MOE Part 1.9 Scope of maintenance services to be provided must be amended in accordance with your exposition change procedures to align with the CASR Part 145 Approval certificate 1-11HDHI issue 1. The supplement should now be included in your exposition and managed using your exposition change process.

If you require any further information in relation to this matter please contact Mr Nicholas Ward on 02 6217 1022.

Yours sincerely

Peter Boyd
Executive Manager
Standards Division
